DETAILED ACTION

Allowable Subject Matter

Claims 1,3-8,10-15 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance: With respect to independent claims 1,8,15, the prior art of record does not disclose nor teach a radiation-production system that produces extreme ultra-violet radiation, wherein particles produced as a by-product of extreme ultra-violet radiation production move substantially in a particle-movement direction; and a radiation-collection system that collects the extreme ultra-violet radiation, the radiation-collection system being arranged to collect extreme ultra-violet radiation which radiates in a collection-direction, the collection-direction being substantially different from the particle-movement direction, wherein the radiation-production system comprises two oppositely chargeable electrodes that generate an electric field therebetween, and the electric field substantially follows an axial direction of the radiation-production system, in combination with the remaining aspects of the claims.

In addition, applicant's arguments, see amendment/arguments, filed 6/30/06, with respect to claims 1,3-8,10-15 have been fully considered and are persuasive.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
